Technical Information

High Definition Portable Acquisition System

Preliminary

The 2/3" 3-CCD High Definition Portable Camera uses newly developed FIT-CCD pick-up elements, reducing head weight to less than 5kg. Together with the 1.6kg lens, total weight is approximately 7.5kg, for high mobility.

The 1/2" High Definition Portable VTR is the world's first UNIHI recorder in a battery operated portable format and boasts an ultra-light weight of only 23kg. With this combination, original acquisition is now true possibility.

Panasonic U.K. Ltd.
